

DATA CENTER ISTANBUL TURKEY

Star of Bosphorus data center will leverage managed & cloud services of NGN, a global system integrator operating in Turkey and Middle East. The data center will be the first 'carrier neutral' commercial data center in Turkey and one of the few facilities in the world certified by the Uptime Institute with Tier III Design & Facility certificates. It will have total power consumption of 16 MW and operate over 2.000 standard racks in approx. 5.000 sqm space.

On behalf of Star of Bosphorus, convex acts as the Owner's Representative and steers and supervises the complete civil works as well as the HVAC and small power and lighting works at site.
