

FEASIBILITY STUDIES FOR LANDFILL GAS POWER PLANTS

TURKEY

convex Ltd. Şti. is providing technical consultancy services and preparing feasibility studies for landfill gas power plants. Within the studies, convex is measuring the biogas yield, and based on this, determining the economical installed capacity as well as the CAPEX and OPEX costs for the targeted power plants.

convex Ltd. Şti. has prepared feasibility studies for landfill gas power plants for various landfills in Turkey, such as for the Karabük, Düzce, Trabzon and Didim landfills on behalf of Kalemci Yapı A.Ş. and for the Şanlıurfa and Aksaray landfills on behalf of Trenkwalder Grup Yönetim Hizmetleri A.Ş..
